## Better Technology. Safer Repair.

Featuring innovations from the leader in the industry, Rubberhog Original SSG 'structured teeth' use the best technology to ensure peace of mind.

- Buffs cooler, no scorching.
- Greater bond strength, for a safer repair.
- Faster material removal, saving operating time.
- Fantastic wear life, costing you 30% less per repair.

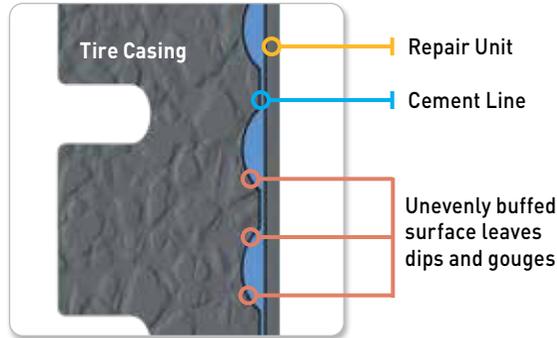

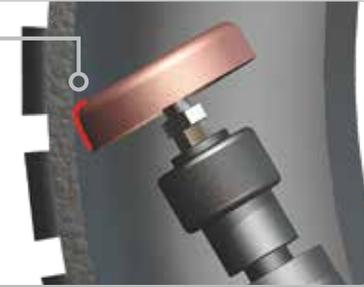

**3X-5X the life**  
of standard copper-grit tools!

### ► Competitor [Performance Drawbacks]

#### ■ Flawed Shape

Most low-end buffing tools do not properly match the shape of the tire.

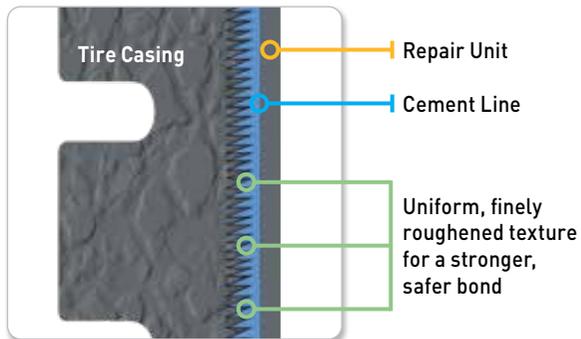

### ► Rubberhog [Superior Performance Design]

#### ■ Unique Profile

Flared Contour Wheels properly match the shape of the tire.

- Provides wide, level contact with surface.
- Efficient use of the entire tool.
- Easier to use - less operator fatigue.
- Reduced buffing time.

### ► Flared Contour Wheels

#### ■ Low-Profile, High Performance Tires

- Unique design allows buffing in low-profile tires without risking sidewall damage.
- Solid steel construction makes this the smoothest-running product available.

Part No.	Diameter	Bore	Coating
140	1-1/4"	3/8"-24	Fine (170)

#### ■ Passenger & Light Truck

- Convenient sizes for a wide range of passenger & light truck tires.
- Optimal control for quick results on smaller tires.

Part No.	Diameter	Bore	Coating
100	1-3/4"	3/8"	Fine (170)
102	1-3/4"	3/8"	Medium (230)
130-170 (Shown)	2"	3/8"	Fine (170)
130-230	2"	3/8"	Medium (230)

#### ■ Passenger through Commercial Truck

- Versatile design for the largest range of tire sizes.
- The preferred choice amongst most technicians.

Part No.	Diameter	Bore	Coating
107 (Shown)	2-1/2"	3/8"	Fine (170)
109	2-1/2"	3/8"	Medium (230)
111	2-1/2"	3/8"	Coarse (390)

#### ■ SUV, Off-Road, and Commercial Truck

- Designed for fastest buffing in larger tires.

Part No.	Diameter	Bore	Coating
112	3"	3/8"	Fine (170)
114 (Shown)	3"	3/8"	Medium (230)
116	3"	3/8"	Coarse (390)

### ► Economy Flared Contour Wheel

#### ■ Passenger & Light Truck

- Proven Rubberhog shape.
- Uses the Standard Grit coating for an economical solution.
- Reduced aggressiveness for the less experienced user.
- **Much** safer than black stones!

Part No.	Diameter	Bore	Coating
130	2"	3/8"	60 Grit

### ► PolyPlugs

#### ■ Performance-enhancing Inserts

- Compensates for mounting inaccuracies.
- Improves wheel life, and protects from damage.
- Reduces vibration for smoother, quieter, more comfortable operation.
- Reusable!

Part No.	Diameter	Bore
150	1-3/4"	3/8"
151	2"	3/8"
152	2-1/2"	3/8"
154	3"	3/8"
